

INSTALLATION INSTRUCTIONS

FUEL HOSE KIT

2015+ SUBARU WRX

Document: 19-0138

Support: info@radiumauto.com

WARNING: KEEP AREA CLEAR OF SPARK AND FLAME. CLEAN UP ALL FUEL SPILLS IMMEDIATELY.

STEP	TOOLS NEEDED	INSTRUCTIONS	PHOTO
1	Rag	Have rags or paper towels on hand.	
		Place a rag below the fuel line connections to catch dripping fuel when the line is disconnected.	
		Release the locks on the fuel line fittings by pulling the blue tabs outward.	
		Slowly disconnect the hose from the pipe while covering with a rag to block any residual fuel spray.	
2	11/16" Wrench	Install the SAE quick connect adapter fittings into each end of the hose included in the kit and tighten, as shown.	
	3/4" Wrench		
3	Oil	<p>Apply a small amount of engine oil to the male OEM mating tubes on the engine and at the firewall. Fully seat the new assembled hose fittings onto these tubes.</p> <p>Next, hold the green retaining clips in place over the Radium adapter fittings. Using the included stainless steel screws secure the retaining clips into place.</p> <p>Start the engine and check for leaks.</p> <p>Installation complete</p>	
	5/64" Allen Wrench
