

WANT MORE GRIP? MITSUBISHI COLT RALLIART 02+

Whiteline is proud to offer its range of engineered performance suspension products. The range boasts a solid rear 22mm anti roll bar (BMR91) complete with premium quality mounting components and ball joint drop links. The fitting of bigger Whiteline swaybars is still the best dollar for dollar handling improvement you can make. Cornering loads are spread more evenly across the tyres delivering more grip and frankly, that's what it's all about. You also get improved tyre wear as your tyres stay flatter and more upright. Comfort improves because your car sits flatter through bends meaning less movement inside the vehicle. Whiteline swaybars are manufactured using the finest grade spring steel. They are powder coated and supplied with high performance polyurethane mounting bushes and alloy lateral locks in a DIY kit form, ready to simply bolt on.

The front end is transformed via a complement of front control arm bushing applications offering great positive caster gains. 2 options are available covering a street set up or a track option depending on your driving style and requirement. Also available is an on car adjustable engine steady arm.

Location	Description	Part #	Comments
